

# SYEDA BUSHRA BANU

Full Stack Developer

Hyderabad, India | +91-9912725181 | pbushrabanu@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## SUMMARY

Full Stack Developer with 3+ years of work experience, including 1.5 years building web applications with React, TypeScript, Python (FastAPI), Node.js, PostgreSQL and AWS. At Today's Dental Services, a multi-clinic dental group, I build the operations platform staff use every day, including accounting with AI agents, training, credentialing and online payments, and the websites patients see first. Skilled in prompt engineering and in building and working with AI agents.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript (ES6+), SQL, Java

**AI & Agents:** Prompt engineering, LLM tool-calling agents, AI browser agents (Playwright), Amazon Bedrock, Claude Code

**Frontend:** React.js, Next.js, React Native (Expo), Astro, Vite, Tailwind CSS, Bootstrap, HTML5, CSS3

**Backend:** FastAPI, Flask, Node.js, NestJS, REST APIs, GraphQL, Socket.IO / WebSockets, JWT authentication

**Databases:** PostgreSQL, MySQL, DynamoDB, SQLite, Prisma ORM, Alembic migrations, Supabase

**Cloud & DevOps:** AWS (CDK, Lambda, API Gateway, S3, SES, EventBridge, Cognito), Git, GitHub Actions, CI/CD

**Security:** AES-256-GCM encryption, secrets management, role-based access control, audit logging

**Testing & Tools:** pytest, Vitest, React Testing Library, Playwright, Zod, Postman

**Integrations:** Open Dental, Odoo ERP, Authorize.Net, Razorpay, Cherry

## WORK EXPERIENCE

**Full Stack Developer** — Today's Dental Services, Hyderabad

Jul 2025 – Present

**Accounting: Bank Reconciliation & Invoices** · Python, FastAPI, PostgreSQL, Next.js, Node.js, Playwright, LLM agents

- Wrote the payment-to-bank matching engine in the old platform, then grew the new one from 8 to 13 passes.
- Raised auto-match rates from about 30% to 80% on two clinics' real books, and validated 9 clinics in total.
- Added refund netting, payer-lump and check-to-EFT matching, plus a recovery pass for missed rows.
- Connected Open Dental, Odoo ERP, Cherry, Authorize.Net and bank-statement data into reconciliation.
- Built the on-site AI agent's accounting captures: an LLM navigates Cherry, Sunbit and CareCredit portals.
- Kept every amount and clinic check in plain code and passwords away from the AI, with 167 tests.
- Built vendor-invoice capture that pulls bills from supplier portals into the invoice intake queue.
- Built an accounting AI assistant with runbooks that guide staff through reconciliation and month-end close.
- Built the all-clinics summary grid and income statement report, and worked on invoice and analytics screens.

**Payments & Security** · Python, FastAPI, Authorize.Net, AES-256-GCM

- Built live Authorize.Net card payments for clinic bill-pay pages, now running in production.
- Added a per-clinic on/off switch and duplicate-charge protection, covered by 70 tests.
- Built a standalone secrets vault with strong encryption, per-organisation keys, access roles and an audit trail.

**Training & Certification** · React, TypeScript, AWS CDK, Lambda, DynamoDB

- Built the full training module: courses by role, onboarding tracks, manuals and e-signed PDF certificates.
- Added video tracking that stops skipping ahead, so a course completes only when 90% is really watched.
- Built its AWS back end: API Gateway, Lambda, 17 DynamoDB tables, S3 and daily SES reminder emails.

**Provider Credentialing** · FastAPI, PostgreSQL, Alembic, Next.js

- Designed and built the system that replaced a spreadsheet for tracking dentists' insurance enrollments.
- Added a workflow with 9 statuses, live NPI registry checks, Excel import and automatic expiry alerts.
- Encrypted sensitive data such as SSNs and covered the module with 685 automated tests.

## Clinic Websites · React, TypeScript, Astro, Vite, Amazon Bedrock

- Work on the group's websites: online booking, rescheduling, callback forms and e-signed consent forms.
- Improved the AI chat widget with auto-reconnect and iOS fixes, and added SEO structured data.
- Built [rockawayinternalmedicine.com](https://rockawayinternalmedicine.com) from scratch and rolled out an insurance-plan page to 9 sites.
- Added an appointment tool to a clinic's AI chatbot (Amazon Bedrock) and a daily callback report by email.

## Full Stack Development Intern — The Siasat Daily, Hyderabad

Mar 2025 – May 2025

- Built responsive web pages with HTML5, CSS3 and JavaScript for a news site with 1M+ monthly visitors.
- Developed back-end features in Python (Flask) for form submissions and API requests.
- Connected third-party APIs for live content feeds and user login.

## Data Curator Associate — JUKSHIO Technology Innovation Pvt Ltd, Hyderabad

Mar 2023 – Mar 2025

- Cleaned and labeled 10,000+ image samples for computer-vision model training.
- Kept annotation standards consistent, helping improve model accuracy by 15%.
- Tested AI recommendation systems in retail stores and wrote feedback reports for the product team.

## PROJECTS

---

### Healio – Healthcare Marketplace App · NestJS, Prisma, PostgreSQL, React Native (Expo), Next.js, Socket.IO, Razorpay

- A healthcare marketplace connecting patients with doctors, hospitals, labs, pharmacies and insurers.
- Built 17 of 33 NestJS backend modules and designed 25 of its 57 Prisma database models.
- Built e-prescriptions, insurance claims, home care, real-time chat (Socket.IO) and appointment reminders.
- Added Razorpay payments so each partner is paid into their own account, with verified webhooks and refunds.
- Secured the API with signed short-lived file links, rate limiting, upload checks and SSRF protection.
- Built most of the patient and partner apps (57 of 65 and 37 of 69 screens) and a 52-page partner portal.

### Dentipal – Dental Staffing Marketplace · React, TypeScript, AWS Lambda, DynamoDB, Cognito

- Fixed role-based access, job-posting dashboards and profile data on a site where clinics hire dental staff.

### E-Commerce Platform · React, Flask, MySQL, Razorpay, AWS Lambda

- Online store with a cart, secure Razorpay checkout and a serverless order-notification service on AWS Lambda.

## EDUCATION

---

### Master of Computer Applications (MCA)

Jun 2023 – May 2025

Mesco Institute of Management & Computer Science, Hyderabad

### Bachelor of Commerce (B.Com)

May 2020 – May 2023

Girraj Govt College, Telangana University, Nizamabad

## CERTIFICATIONS

---

- Soft Skills Training Certificate – Mahindra Pride Classroom, Nandi Foundation (Jan – Feb 2023)
- Youth Employment Programme (YEP) – Tata Consultancy Services (Apr – Jun 2022)
- Post Diploma in Computer Applications – CSCE Computer Education, Nizamabad (2016 – 2017)

## ACHIEVEMENTS

---

- NCC 'C' Certificate – represented my unit at the EBSB National Camp; leadership and teamwork (2022 – 2023)
- NCC 'B' Certificate, Army Wing – training in leadership, endurance and disaster management (2021 – 2022)
- Silver Medal – State Wrestling Championship (2018)
